

MonLines myTVLift MLS007B

Electric built-in TV lift

Description

The electric built-in TV lift from MonLines is suitable for TVs with a size of 37" to 65 inches and a maximum weight of 50 kg and can be retracted into a piece of furniture. At the push of a button, the screen extends to a height of up to 165 cm. When extended, the motorized TV lift can also be swiveled 225° to the left and 90° to the right. Preferred positions can be easily saved.

Thanks to the anti-collision function, the TV is protected from possible damage: If there is an obstacle in the way, the myTVLift automatically stops moving. The integrated cable management ensures tidy, neat cable routing inside the TV lift.
